1. **IMM** – Once the 2012 Plan/IMM is created, changes to the 2011 IMM are not automatically rolled into the 2012 IMM. The CCIP was modified to make the previous year's (e.g. 2011) IMM read only. The user will have access to view the 2011 IMM, but will receive a message that states the 2011 IMM is read only and IMM edits must occur in 2012. The user is provided with a link that allows for quick navigation to the 2012 IMM. This change only applies to the IMM and not the Plan. Plan changes for 2011 can continue to be made after the 2012 plan is created.

2. **IMM** - The Team Narrative Evaluation of Plan Results and Processes now has five revised and one new question. This should be used at the end of the school year to evaluate the impact of the improvement process. It is critical to learning and understanding what changes in adult practices throughout the system resulted in changes in student performance.
   In this example the district created their 2012 CCIP in April; the 2011 plan became read only before they could do their end of year evaluation. They should complete this evaluation at the end of 2011 and enter their results in the 2012 IMM.

3. **DF** – The table headers in the “Print All” screen no longer appears until the report is generated (this may take an hour or more). This improves the Print All function. When you request your first “Print All”, you will only see the data entry boxes, not the headings. After the .pdf is generated, you will see the header and be able to download the .pdf by clicking the Doc Key number.
