Supplemental Educational Services (SES)
Quality of Provider Services
Rubric Rating Tool

Trained ODE representatives will observe selected SES providers during tutoring sessions. The SES provider quality of services (QoS) rubric rating tool will be used to determine a quality standard expectation of the provider services.

Review Process

Approximately 45 minutes prior to observing tutoring, the observer should conduct the brief interview with the director of the program using the questions on page 5 of this document. The purpose of the interview is for the evaluator to gather background information about the program. The information obtained should provide the context for observing tutoring. The focus should be on gathering information about the program rather than transcribing direct quotes.

When the tutoring session begins, the observer should start completing the Context and Activities form.

While observing the session, the reviewer should look for indicators of effective practice across the following three constructs:

1. A focus on learning is maintained.
2. Appropriate support is provided for students to be engaged in learning.
3. The learning environment is supportive of student learning, safety and well-being.

After documenting practices observed and collecting data on the entire tutoring session, observers should use the rubric's definitions and examples of effective practice, along with their best judgment, to complete the ratings.

The examples listed under each indicator are not inclusive of all examples and should not be used by the reviewer to help determine a single rating score for a particular indicator. Once the three construct tables are completed, the single rating score generated for each table must be placed into the summary table.

At the end of the review process, once all data have been collected and ratings completed for each construct, the reviewer must determine the overall quality of the session and provide a brief summary of the positive, high-quality aspects of the session and any concerns.

Ohio | Department of Education

Center for
School Improvement

Observation Rating of Constructs

The reviewer will rate each indicator on a six-point scale, with "0" representing the lowest level of effective practice found and "5" representing the highest level of effective practice found. The following definitions should be used when rating the provider:

Category	Score	Definition
Lowest	0	No evidence found to indicate the specific practice is occurring.
	1	Practice rarely found and is of poor quality.
	2	Insufficient level of practice; not enough in frequency or quality to improve the academic performance of the majority of students observed.
	3	Acceptable, but not remarkable, level of practice; sufficient in quality and frequency to improve the academic performance of a minimum of students observed.
	4	Above-average practice; good in quality and frequency to improve the academic performance of many of the students observed.
Highest	5	High-quality practice occurring frequently across majority of observations; convincing data that the effective practice is improving the academic performance of the majority of students observed.
No Data Collected		The reviewer did not collect evidence on this practice and therefore is unable to select a score for this particular exemplar. Selecting "No Data Collected" will not reduce the rating within the broader construct.

No decimals are permitted when selecting a score. The six-point scale assumes that the reviewer has searched out and collected enough data to respond to each of the indicators. In some instances, however, a reviewer may not have searched for data on a particular indicator and therefore, is unable to select a "0" to "5" score for that particular practice. In these instances, the reviewer should select "No Data Collected."

Note: There is a difference between a score of "0" compared to "No Data Collected "The "0' " scores are averaged into the overall rating for a particular construct (e.g., conducive learning environment) and will, therefore, reduce the overall rating for that area. The "No Data Collected" responses are not included in the average calculation for that particular construct and, therefore, will not reduce the provider's rating for that particular construct.

Promising Practices

The indicators and examples of effective practice on the following pages were informed by the following sources:

- *Community programs to promote youth development.* Eccles, J.S. & Gootman, J.A. (2002);
- *The Study of Promising After-School Programs: Descriptive Report of the Promising Programs*. Vandell, D; Reisner, E.; Brown, B.B.; Pierce, K.; Dadisman, K.; Pechman, E. (February 2004);
- *Study of Promising After-School Programs. Observation Manual for Site Verification Visits*. Policy Studies Associates, Inc., Wisconsin Center for Education Research (Spring 2005);
- *Out-of-School Time (OST) Observation Instrument*. Policy Studies Associates, Inc. (December 2005);
- *Tutoring. Educational Practices Series* - 5. Topping, Keith. (2000) Center on Innovation and Improvement; and

Definitions for Activity Type and Knowledge/Skills

Test preparation/ study skills	Instruction and activities expressly designed to prepare students for standardized achievement tests or to teach them study skills. Activities may include practicing different types of test questions or taking practice tests.
Tutoring	Students work individually or in small groups with a tutor, who helps them work on a particular skill such as reading, math or English language skills.
Computer instruction	Using the computer to practice test-taking skills, practice academic skills or for an academic enrichment activity.
Other	Describe content areas/activities observed that cannot be categorized or grouped above.

Introductory Interview Items:

(Focus on contextual information that will enhance your understanding of the tutoring you are about to observe.)

1. How long have you been a provider of SES services? 2 years

2. Describe the students you serve.
   a. How many students are you expecting in this session? 5 to 6 students
   b. Do you have non-SES students participating in tutoring? Yes, we tutor year round with other students

3. Describe what I/we should see in this session.
   Hands on activities, kinesthetic learning with engagement and connected to Ohio Academic Standards.

4. What else should I/we know about your program?
   All students are teachable and can learn at any level. We understand that each student is different

5. How do you communicate feedback concerning student progress? Monthly reports to parents and
   a. What kind of feedback do you provide? Written reports and parent conferences
   b. How often do you provide feedback? Monthly reports
   c. What response do you get? The feedback we receive is positive.

Construct **Average Rating** 2

1. A focus on learning is maintained.

High Levels of Effective Practices	Score	Low Levels of Effective Practices
Target A. A clear learning goal is established for each child in the tutoring session. • Skill building activities are provided to students. • The tutor explains to the student what skills he or she is learning.	2	**Target** A. A clear learning goal is not established for each child in the tutoring session. • Activities do not build students' skills. • Activities are unfocused and not structured to develop a particular set of skills. • Activities are simply homework assistance.
Content B. The content, as presented by the tutors, is factually, procedurally and conceptually correct and accurate. • Materials are appropriate to the students' instructional level. • Learning is scaffolded for students' understanding.	2	**Content** B. The content, as presented by the tutors, is not factually, procedurally and conceptually correct and/or accurate. • Incorrect information is presented by the tutor(s). • Students' frustration is apparent and is a barrier to learning.
Activities C. The instructions for activities are clear and easily followed by students. • Tutors understand the activities and are prepared to support students in learning. • Students understand and follow instructions. • Tutors explain to students the reasons for the activity.	3	**Activities** C. The instructions are unclear and not easily followed by students. • Students may not know what they are supposed to be doing or why they are doing it.
Communication D. Tutor and student conversations are frequent and reciprocal. • Tutors respond to students' initiation of dialogue and show interest by commenting or asking questions. • Tutors initiate conversations with students. • Students discuss back and forth and offer their comments. • Tutors informally assess student learning.	2	**Communication** D. Tutor and student interactions are infrequent and one-sided. • Tutor does not converse or interact with students. • Tutor does not assist students. • Students do not participate in discussions. • Tutors do not informally assess student learning.
Instructional Techniques E. Tutors ask students "why, how and what if" questions as appropriate to the activity. • Tutors ask students questions that require extended responses. • Tutors ask students to explain their answers.	2	**Instructional Techniques** E. Tutors do not ask students "why, how and what if" questions as appropriate to the activity. • Tutors do not ask students questions that require extended responses. • Tutors do not ask students to explain their answers.

Please provide additional notes on p. 11:

Construct **Average Rating** 3

2. Appropriate support is provided for students to be engaged in learning.

High Levels of Effective Practices	Score	Low Levels of Effective Practices
Engagement Focus A. Students appear to be engaged, focused and interested in their activities. • Students are engaged in the focal activity and/or are using free time appropriately. • Students follow directions. • Groups of students are fully on-task and contributing during group activity.	3	**Engagement Focus** A. Students do not appear to be engaged, focused and interested in their activities. • Students are off-task or not attentive to the tutor or the activity (disrupting the lesson, blurting out, unseated and wandering about the room.) • Students are not engaged in the work provided to them; they may be completing the assigned work, but are not actively engaged in the work (daydreaming, taking longer than expected to complete the work, etc.). • Students appear bored or distracted.
Relationship/Support B. Tutors and other provider personnel respond to students in a warm, supportive manner. • Tutors use a positive tone of voice and offer encouragement. • Tutors offer specific suggestions to students for improving skills and performance, providing examples of what they like about the work in progress.	3	**Relationship/Support** B. Tutors and/or other provider personnel are flat or negative with students. • Tutors and/or other provider personnel appear bored, tired or distant. • Tutors and/or other provider personnel show disrespect for students.
Motivation/Encouragement C. Tutors and/or other provider personnel praise students' efforts and encourage students to continue working on building skills. • When a student struggles to master a skill, the tutor helps the student see it simply as a setback instead of as an inability. • The tutor encourages the student not to give up trying. • The tutor encourages a struggling student to try a new activity or approach.	3	**Motivation/Encouragement** C. Tutors and/or other provider personnel criticize the student's efforts and discourage the student from making more attempts to develop skills. • Tutors and/or other provider personnel blame the student's failure on inability. • Tutors and/or other provider personnel do not encourage further efforts to develop the skill. • Tutors and/or other provider personnel do not encourage students to try new approaches when struggling. • Tutors and/or other provider personnel do not encourage students to challenge themselves.
Progress/Review D. Tutors and/or other provider personnel give students the opportunity to review their progress regularly and to experience ongoing successes. • Questions such as, "What can you do now that you could not do before?" or "What did you learn today?" are asked.	3	**Progress/Review** D. Tutors and/or other provider personnel do not give students the time to reflect on their progress. • Student progress is not acknowledged. • The student is not encouraged to celebrate successes.

Please provide additional notes on p. 12:

Construct **Average Rating** 3

3. The learning environment is supportive of student learning, safety and well-being.

High Levels of Effective Practices	Score	Low Levels of Effective Practices
Effective Management A. The Provider uses effective techniques to control the environment. • Tutors communicate behavioral expectations and intervene constructively and calmly to address disruptive behavior by redirecting students and/or explaining why the behavior is unacceptable. • Tutor is aware of and addresses teasing, bullying or other conflicts between students. • Provider is aware of all situations in the room. • Distracted students are redirected or refocused. • Provider intervenes when appropriate and necessary.	4	**Effective Management** A. The provider uses moderate or heavy amounts of ineffectual control tactics. • There is evidence of yelling, shaming or disparagement of students by the tutor. • Tutors correct students publicly in ways that embarrass or belittle them. • Tutors ignore behavioral issues and/or student conflicts. • Tutors use hard or rough punishment. • Provider allows disruptive or inappropriate situations to get out of hand before intervening. • The techniques used by the provider to control the environment are unsuccessful.
Level of Control B. Activities and interactions are structured in such a way that levels of Provider control are appropriate. • Provider responds to students who ask for assistance. • Students are not over-controlled. • Provider demonstrates respect for students' autonomy and responsibility.	4	**Level of Control** B. Provider is highly over-controlling. • Little or no student discussion or involvement. • The provider does not encourage student spontaneity and creativity. • Activities are provider-directed.
Transitions C. Activity transitions are orderly and efficient. • The activity area is prepared and ready when students arrive. • Transition times between activities are minimal; students do not need to wait a long time for an activity to start. • Materials are accessible, functioning and efficiently dispersed to students. • There are enough materials to allow students to participate simultaneously in activities.	2	**Transitions** C. Transitions between activities are chaotic. • There are long waits between activities. • Materials are not functional or are not available in the necessary quantities. • Provider is not prepared for the activity. • Students may not know where they are supposed to be or where to go next.
Instructional Environment D. The environment contributes to instruction. • Group order is well-maintained through active student engagement in activities. • Noise levels, talking, movement and classroom interaction are consistent with and related to the instructional activities. • External distractions are minimized and do not impact learning. • Tutors and/or other provider personnel support each other (when multiple provider members are observed).	3	**Instructional Environment** D. The environment does not contribute to learning. • Students are out of control during transition, activities, or free time. • Students misbehave. • Students misuse materials. • Distractions outside the observed activity interfere with students' participation and/or experiences. • Provider members work at cross-purposes or give conflicting information.

Please provide additional notes on p. 12:

Summary Rating Table

The rating generated for each construct, which is located in the upper right-hand corner of the previous tables, must be written in the following summary table. The reviewer also must provide evidence/notes that justify why a particular rating was made.

Construct	Average Rating	Weight (Multiply by)	Final Score
1. A focus on learning is maintained.	2	5	10
2. Appropriate support is provided for students to be in engaged in learning.	3	3	9
3. The learning environment is supportive of student learning, safety and well-being.	3	2	6
Final Total Score (Sum of all scores)	X	X	25

Summary of the Overall Quality of the Session

At the end of the entire review process, once all data have been collected and ratings completed, the reviewer must summarize the overall quality of the provider session.

The reviewer must select the rating that best represents the overall quality of the provider session, based upon the criteria listed in the right column.

Overall Rating	Level of Quality and Degree of Concerns	Required Scoring Across the Three Constructs
☐ High Quality	The observer has no concerns regarding the quality of services. The provider is encouraged to share best practices.	Range 45-50
☐ Good Quality	The observer has minimal concerns regarding the quality of services. The provider is encouraged to continue implementing quality practices.	Range 35-44
☐ Acceptable Quality	The observer has few concerns regarding the quality of services. The provider is encouraged to consider improving the level of quality practices.	Range 28-34
☑ Limited Quality	The observer has several concerns regarding the quality of services. ODE will be contacting the provider to develop a plan of action to address concerns.	Range 18-27
☐ Poor Quality	The observer has serious concerns regarding the quality of services being provided. ODE will be contacting the provider to develop a plan of action to address concerns and for continued monitoring.	Range 17 or lower

Provide a brief summary of the positive, high-quality aspects of the session and any concerns (if applicable):

The focus on learning is limited in scope due to a single delivery system for students of varied ability. Secondly, the scope of learning was focused only on the number-number sense component of mathematics and finger tricks to support multiplication facts. Problem solving and thinking skills were not emphasized.

Support for student engagement was also limited by the single delivery system as some students could complete tasks or calculations quickly while others needed more time. In some cases this created a situation where students waited up to 12 minutes before being allowed to move to another task. Minimal materials and the single delivery approach did not allow for students to move on to additional tasks in a timely fashion.

The tutor is positive and monitors students during activities.

The environment is safe and appropriate for learning. The classroom provides students with tables and a white board for instruction.

Notes from p. 4 – Context and activities observed.

There were 4 middle school students in the science room. Three boys and one girl were seated at different science tables. The presentation was aimed at the whole group. Students were following the teacher's presentation and responding to questions.

Teacher was using the white board and asking students to identify mathematical patterns that centered on multiplication and addition facts.

Notes from p. 6 – A focus on learning is maintained.

The learning target is a general target for all students.

2:23 The tutor is using a common lesson with students engaged in answering questions about patterns. Teacher is leading the whole group. Two of the four students are participating and answering most of the questions. No materials are in use as student look at patterns of numbers on a white board to identify patterns.

2:37 Students receive a worksheet that is a timed multiplication factor test. This is a common worksheet in which student fill in patterns of numbers. Some students are done well ahead of the others creating a long wait period while others finish. Students are encouraged to use finger tricks to arrive at the correct answers.

At 3:00 students begin a game of patterns that is to last the remainder of the time. This game advances students along a line across the room as students answer a two or three digit multiplication problem correctly. Students are having difficulty with the game and the tutor provides support by reviewing finger tricks to multiply answers. The activity is frustrating to most of the students.

Communication tends to be one way as the teacher leads with questions and students try different techniques to accomplish tasks.

In general, instructional delivery is a common lesson for all students even though ability levels appear to vary from student to student. This creates a pacing problem as some students complete the task quickly and wait extended periods of time for other students to complete the question or assigned task.

The entire lesson is centered on number-number sense with very little critical thinking observed.

Although a review of the learning plans indicate the need for differentiated instruction a single lesson is delivered for each student.

Notes from p. 7 – Appropriate support is provided for students to be engaged in learning.

Engagement varies depending on ability of student. During the pattern recognition two students dominated the responses. During the game activity one or two students were moving forward and others were not actively participating until prompted by the tutor.

Relationship support was adequate as the tutor used a positive tone for most of the tutoring time.

Motivation and encouragement were adequate with the tutor responding positively to students noting different patterns and encouraged students while completing the timed exercise on patterns.

Progress review was not observable during the tutoring session.

Materials used were minimal. A common timed worksheet was distributed to all students but most math work used finger tricks rather than pencil and paper.

Learning plans consisted of a Hayes Publishing Pre-Assessment and a place for the tutor notes (which was blank for all the students in this session). Additionally there was a diagnostic graph for reading and math and an area for strengths and weaknesses. Work units were assigned by the week along with a learning style inventory. The assignments and inventory indicated that students should have different lessons, but during this observation time a single delivery system was used for all students. This created some pacing issues as some students waited at least 5 to 12 minutes for other students to complete the assigned task.

Notes from p. 8 – The learning environment is supportive of student learning, safety and well-being.

The room is located across from the school office providing posivitve visibility for security.

Management of the room is appropriate. Students appear to work well together throughout the session.

The tutor is aware of the actions of all students in the room.

Level of control is appropriate as students move from one activity to the other at the request of the tutor.

Transitions are cumbersome as some students complete tasks sooner than others. Student wait time ranged from 5 minutes to 12 minutes between tasks.

In general the environment is supportive and safe. In spite of the wait time students were compliant and waited patiently for the next task.
