CCIP Note #300

Keywords: Allocations
Attention: Superintendents, Treasurers, Title I Directors/Coordinators and Consolidated Application Contacts
Summary: ODE completed federal programs re-allocations as a result of updated School Options Enrollment System (SOES) counts for community schools.

FYI

ODE Completed Federal Programs Re-Allocation

Superintendents, Treasurers, Title I Directors/Coordinators and Consolidated Application Contacts

Earlier this week ODE completed Federal Programs re-allocations which accounted for updated School Options Enrollment System (SOES) counts of economically disadvantaged students enrolled in community schools.
The reallocation may result in either a decrease or increase of the original allocation of most traditional districts that have students attending a community school and also the allocations of community schools. The reallocation is based on the October SOES counts of economically disadvantaged students reported by community schools and reviewed by the districts. The SOES data affects allocations for Title I and II-A grants. Any decrease in allocations below the approved budget amount will require the district to complete a budget revision. Like most procedures generated by ODE through the CCIP, an e-mail is forwarded to the district contact for the application group (in this case the Consolidated Funding Application) and a "Revision Started" status is generated.

The reallocation is required under Section 76.792 of the federal Education Department General Administrative Regulations (EDGAR). Those regulations also require a secondary reallocation for new community schools or for community schools with significant enrollment increase between November and February 1. Therefore, this “final” reallocation will affect fewer community schools and public school districts. Since these students were not part of the October count, the February “final” reallocation will be prorated.
