Re: USDOE Memo Regarding Summer Extensions/Nonpublic Data System (NPDS) is Now Available
Date: March 2, 2016
To: **Superintendents, Treasurers, Title I Directors/Coordinators and Consolidated Application Contacts**

USDOE Memo Regarding Summer Extensions

The U.S. Department of Education recently released a letter to all state departments of education as a reminder that districts and schools can request summer extensions to use federal resources to support students that receive services during the summer. We encourage your district to review this letter and contact your Office of Federal Programs' consultant if you are interested in using funds from your Consolidated application or 21st Century application (if applicable) for summer programing beyond June 30, 2016.

The Nonpublic Data System is Now Open

The Nonpublic Data System is now available. Nonpublic school principals or personnel with the roles of Data Entry-Nonpublic Programs can upload enrollment information. There are several enhancements to the system this year: 1) the option to import public buildings previously reported; and 2) automated emails for the following statuses when the participation form is transitioned to: a) Nonpublic Approved, b) Public Approved, and c) Correction Needed.

The system will close at 5 p.m. on Friday, May 20, 2016; however, nonpublic data should be uploaded by the end of April to allow public districts time to review and validate the data. For an overview of the system and links to instructional videos, please click here.
