Starting in January 2020, the Ohio Department of Education is unveiling a prototype comprehensive needs assessment tool that will replace the Decision Framework and other needs assessment tools used across the Department. This new "One Needs Assessment" component is designed to get all users accustomed to identifying all their needs in a single location within a standardized timeline. The first-version (or beta testing version) of the One Needs Assessment component is intended to assist in the design and development of a final One Needs Assessment component to be part of the Education Department's System of Tiered E-Plans and Supports (ED STEPS) system.
