Ohio Seeking Input Regarding Nonpublic Data System (NPDS) Federal Reporting Window

The Office of Federal Programs is gathering feedback to determine interest in moving federal reporting in the Nonpublic Data System (NPDS) to October. Currently, state reporting occurs in October, while federal reporting occurs in March. The existence of two reporting windows has sometimes caused confusion and errors, and there have been requests from the field for a single reporting window. The projected state and federal reporting window in NPDS would be from October to December. Fall reporting of federal programs data would begin in October 2022.

The interest survey is available here. The window to provide feedback will close on September 17, 2021.

If you have any questions, please contact federalprograms@education.ohio.gov.
