EDSTEPs One Plan Updates

In FY24, several updates have been made to the One Plan. This documents has samples for SST Consultants to use as they are working with districts.

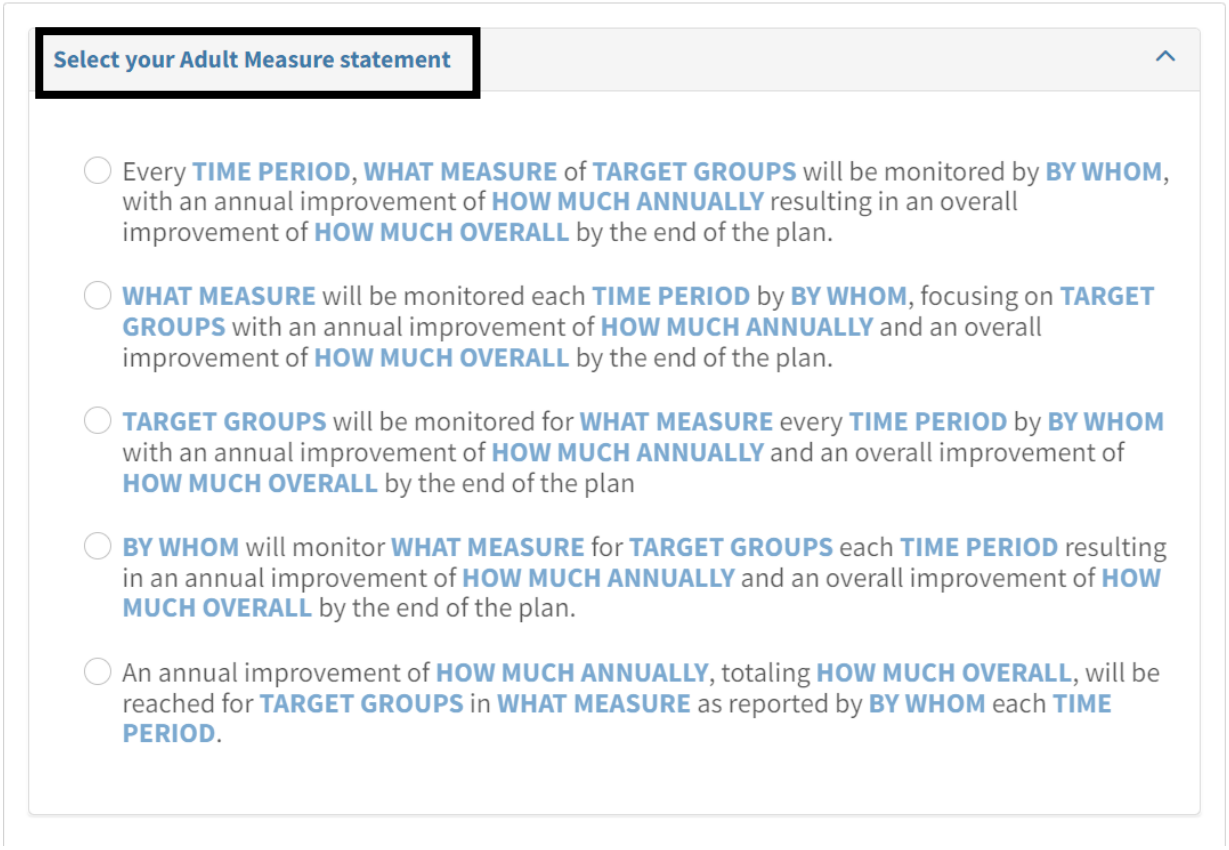

1.) SMART Goals now have 7 SMART Goal Statements that districts and buildings can select from.

2.) Student Progress Measures have been updated to provide 5 student measure statements that districts and buildings can select. **More than one student measure can be added to each goal. This will allow districts and buildings to write a student progress measure for "all students" and their student sub-groups or vulnerable youth populations.*

3) Adult Implementation Measures have 5 statements that can be selected as well. **There can be more than one adult implementation measure per strategy.*

4) The sequence for entering an action step has changed.
* First, describe the action/activity.
* Next, identify which year of the plan the action/activity will begin.
* Thirdly, estimate when the activity will be fully implemented or select end of plan period.
* Then, select who in the district will be involved in the implementation of the action/activity.
* Finally, check the box when the action/activity is completed. The system will automatically check once the end date passes. If need more time, change the end date in the action step.
