Re: Identification Dashboard Released – Register Now for the Webinar on Tuesday, April 30, 2024
Date: April 19th, 2024
To: Superintendents, Treasurers, Authorized Representatives, Fiscal Representatives and Consolidated Funding Application Contacts

IDENTIFICATION DASHBOARD RELEASED – REGISTER NOW FOR THE WEBINAR ON TUESDAY, APRIL 30, 2024

The Ohio Department of Education and Workforce (DEW) has developed an Identification Dashboard to facilitate a better understanding of federal and state identifications of schools and districts. The dashboard allows for a statewide comparison of traditional schools and districts, and community schools, and displays detailed data related to identification criteria and cut points. The dashboard provides several different views of the data, including by region, with trend analyses, and by exit status. Additional identifications (such as special education profiles and ratings connected to IDEA) will be incorporated in the future.

The Department has also updated its identification webpage to include relevant federal and state mandated identifications. Together, the dashboard and the webpage now serve as the main resource for schools and districts to better understand federal and state identifications across the agency.

The Office of Accountability and the Office of School and District Improvement will be hosting a webinar for school and district administrators and staff on Tuesday, April 30, 2024, from 12:00pm – 1:30pm. DEW staff will demonstrate how to use the dashboard and answer any questions related to it. Please register using this Microsoft Teams Webinar registration form. E-mail regional.support@education.ohio.gov with questions.
